

Repairs & Spare parts

Ned Marine Services B.V. provides customized services and carries out repairs, tests and inspections. We also rent various products and can provide you with our expert advices.

- **Rental**

We have various models of gangways and bridges in stock ready for rental or short term lease. We offer fast delivery. Our products are suitable for inland, seagoing and offshore shipping.

- **Repairs**

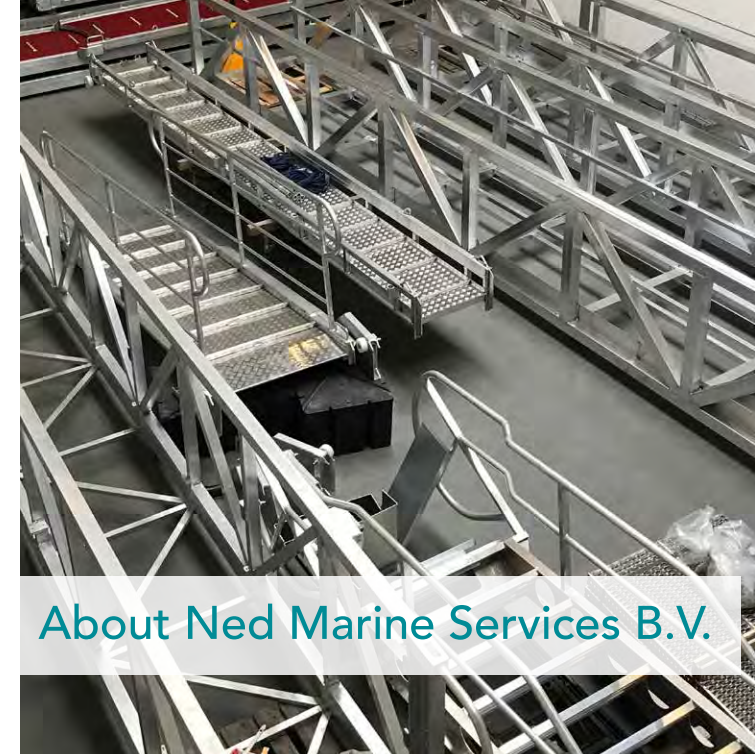

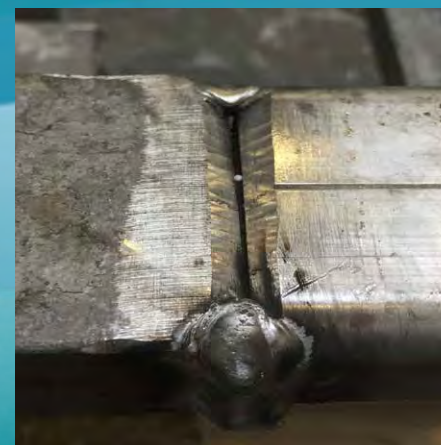

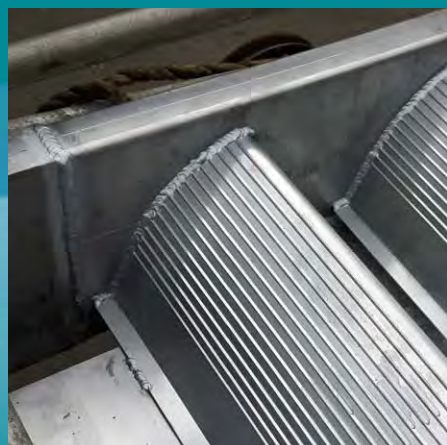

In case of damages it's not always necessary to purchase a new walkway or gangway. We have extensive experience with repairing these products, both inhouse and on site.

- **Tailor made solutions**

A standard product does not always comply. Sometimes it needs to be longer, shorter, wider, lighter or higher. Because we develop and manufacture our own products, customization is always possible. All our bulwark ladders are light, strong and seawater resistant.

- **Spare parts**

We supply spare parts such as repair steps, ropes and stanchions, quay roller and -wheels, round sports for Jacobs/Monkey ladders, (repair) spreaders and stages.

Gangways - Offshore bridges - Wharf ladders

Ned Marine
services B.V.

ALWAYS A STEP AHEAD

Marine

Ned Marine Services B.V. supplies multiple NEN/ISO certified products that offer a solution for the safe access of marine ships, both gangways and accommodation ladders.

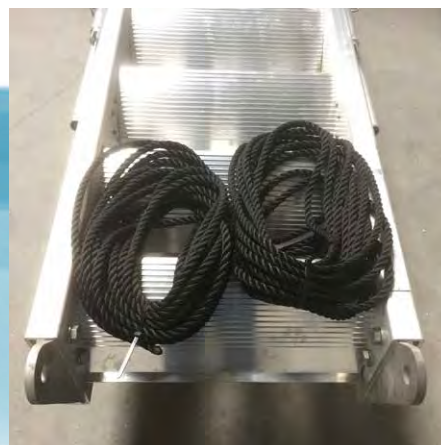

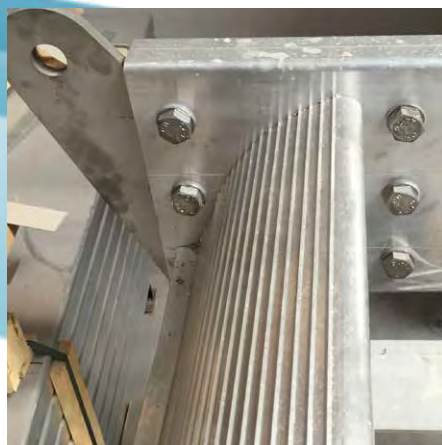

- **Gangway & Wharf ladders**
ISO 7061-2015 certified (Type A and B)

We design and manufacture major quality wharf ladders for seagoing vessels that meet the latest standards. The most common models and dimensions are available from stock. All wharf ladders and components comply with the relevant rules including prescribed in the ISO-Standards and the Maritime Safety Circulars. Of course all wharf ladders are approved by classification societies.

- **Accommodation Ladders**
ISO certified 5488

We provide after-market and OEM-solutions for the accommodation ladder and platforms. The products are fully developed and manufactured in-house, customization is always possible.

- **Pilot ladders and safety nets**
We offer a wide range of products for maritime applications. Rope ladders include: wooden pilot ladders (ISO 799:2004), Goliath pilot ladders (ISO: 799-2010) and aluminium pilot ladders and bulwark ladders (certified by all major classification societies).

Offshore

Ned Marine Services B.V. supplies offshore gangways, access bridges and ship mooring facilities. All of high quality.

- **Offshore bridges**
High demands and standards are always requested for offshore bridges. We have a proven track record of delivering aluminum gangways with different lengths, designed and build under class supervision.

- **Terminals**
We have developed and built specific solutions for dozens of port terminals. It's our aim to have a safe access and exit for crew and terminal staff to and from the ship. Being practical is always our starting point.
- **Access bridges and ship mooring facilities**
We develop and deliver more complexed mooring installations. We have carried out various projects in this area.

Inland shipping

We have a proven track record for the supply of gangways for passenger vessels, both inland- and seagoing. Across Europe and beyond there are dozens of ships sailing with our products. Our gangways are known for their sophisticated and light design with the highest grade and seawater resistant material.

Based on the current standard we have developed a major quality and lightweight ramp for inland navigation. This product is always in stock and can be delivered quickly.

- **Inland Cruise Vessels gangboards**
NEN-EN 14206 certified
- **Inland Vessels**
NEN-EN 526 certifie
